

## High Quality Dental Care in Tijuana with Dr. Landeros

I recently had dental work done in Tijuana, Mexico. I actually have dental insurance in the U.S., however, a ridiculously high co-payment for fairly basic restorative work had me quickly turning elsewhere for my dental care.

My name is Debbie Natsch and I am an employee of Health Travel Guides. I had already visited several dentists in Tijuana as part of my job, so I was fully confident in their credentials, their highly competent and professional manner, the modern feel of their facilities, their exclusive use of US labs for their lab work, and the fact that my work would cost about half of what my co-pay would cost in the states.

However, as someone with a lot of anxiety around dental work, any visit to a dental office as a patient is one too many for me. So, I am happy to report that my experience at Dr. Landeros's office in Tijuana was about the best experience I've ever had at a dental office.

My work consisted of two appointments. I needed a filling on one tooth and a three surface inlay on another tooth. So the first day I had my filling done and a mold taken for my inlays and then capped with temporary material.

The next day I went back and had my inlays adhered, and my teeth were as good as new. The entire process was painless. The office greeted me and started my treatment on time both days, and Dr. Landeros clearly explained the work he was doing. He worked quickly and efficiently and had a wonderfully pleasant manner, as did his whole office staff.

I have been singing his praises to my friends and family and I highly recommend him to anyone in need of dental work.
